

**Amendments to the Specification:**

Please replace the paragraph beginning at page 8, line 21 with the following rewritten paragraph:

01 That is, as shown in ~~Fig. 6~~ Fig. 5, the IC card 50 is a battery-less type IC card which do not have a battery for power supplying, and includes, on a base such as a planar substrate 55, a coil-form loop antenna 52 for receiving the electro-magnetic wave which has been radiated from a data write/read device 60 and converts to the electric signal, a modulation/demodulation circuit 53 for performing modulation of the transmission data or demodulation of the reception data, and a control part 54 for performing analyzing of the reception data and generation of the transmission data.
